## DETAILED ACTION

### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-6 and 21-26 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1-19 of copending Application No. 10/587,374. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the overlap in scope.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6 and 21-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boyce et al. US 4,284,542 alone or in view of vanDrongelen et al US 6,103,814.
5. The rejection set forth under 35 USC 103 in the paper mailed 12/15/05 is deemed proper and is herein repeated.
6. The remarks filed 12/27/07 have been fully considered but have been found not persuasive.
7. Applicants argue that the inclusion of polystyrene does not render obvious the claimed thermoplastic resin. This is not persuasive. The patent specifically calls for the Kraton G 1652, see column 6 lines 66+. This anticipates this claim limitation. The species of thermoplastic resins recited in claim 5 are obvious variants of the Kraton polymer. The van Drongelen et al patent is cited as further showing the claimed species used in adhesive compositions. As such, the use therein is obvious.
